

SailPoint IIQ Course Content

1. Pre-requisites

- . What is Ldap , Ldap Server ?
- . Application Server
- . N-tier Architecture
- . Database

2. Identity IQ Preview

- . Identity IQ Overview, comparison between Other IDM tools
- . Identity IQ Common Components
- . Overview of an IdentityIQ Project

3. Product Architecture – Installation – Deployment

- . Understanding the Product Architecture
- . Understanding the Installation Procedure for Identity IQ

4. Identity cubes

- . Identity Cube Overview
- . Applications/Connectors
- . Identity Mappings
- . Standard vs Extended Attribute
- . Aggregation of Data
- . Capabilities/Scoping/Workgroups

5. Application On-boarding, Correlation

- . On-boarding Applications
- . Account co-relation
- . Application Configuration
- . Logical and Multiplexed Applications
- . SailPoint integration with Active Directory

6. Aggregation Rules

- . Creation Rule
- . Correlation Rule
- . Manager Correlation Rule
- . Customization Rule

7. Risks and Policies

- . Identity IQ Policy Overview
- . Policy Types
- . Defining Policies
- . Discovering and Handling Policy Violations
- . Identity Risk Model
- . Application Risk Model
- . Refreshing and Interaction with Risk scores

8. Policy Violation Rules

- . Violation Owner Rule
- . Custom Policy Violation Rule

9. Certifications

- . Certifications and Access Reviews
- . Types of Certifications
- . Certification Lifecycle
- . Certification Configuration
- . Making Certification Decisions
- . Certification Decisions
- . Certification Events

10. Basics of Java

- . Data types and usage
- . Conditions and loops
- . Methods, method overloading and method overriding
- . Interface and Inheritance
- . Collection framework

11. Certification Rules

- . Certification Exclusion Rule
- . Sign Off Approver Rule
- . Pre-Delegation Rule
- . Identity Trigger and Selector Rule

12. Connector Rules

- . Build Map Rule
- . JDBC Build Map Rule
- . Pre-Iterator and Post-Iterator Rule

13. Roles

- . Role Definition
- . Role Management Benefits
- . Role Model Overview
- . Role Mining
- . Role Management Pointers
- . Entitlement Analysis
- . Birth Right Provisioning

14. Rules, Tasks, API

- . What is Bean Shell?
- . Rules: What? Where? How?
- . Tasks: What? Where? How?
- . Sail Point API
- . Custom Task

15. Reporting

- . Reporting Architecture of Sail Point IIQ
- . Defining Data Sources
- . Report Column Configuration
- . Query Configuration

16. Lifecycle Manager

- . Change Lifecycle
- . Key feature and Considerations
- . Access Request Process
- . Addition Access and Identity Management Options
- . LCM Configuration
- . Additional LCM functionality
- . Joiner/Mover/Leaver LCM Events

17. Workflow

- . What is a Workflow?
- . Workflows in Identity IQ
- . Key Workflow Concepts
- . Workflow case, variables, steps and approvals
- . Workflow Troubleshooting
- . Custom LCM workflow

18. Provisioning Broker and Engine

- . Provisioning Architecture
- . Object Model involved in Provisioning
- . Connectors
- . Walkthrough of Provisioning Process
- . Debugging

19. Provisioning Rules

- . Before Provisioning Rule
- . After Provisioning Rule

20. Upgradation

- . Upgradation SailPoint IIQ 7.0->7.1->7.2

21. Performance

- . Performance Management Approach
- . Tools and Resources
- . Capacity Planning and Sizing
- . Understanding IdentityIQ internals
- . Common Pitfalls to avoid
